

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

## STATE OF THE PUBLIC HEALTH IN THE LAST QUARTER.

"THE Quarterly Returns are obtained from 115 districts, sub-divided into 576 sub-districts. *Thirty-four* districts are placed under the metropolis, and the remaining 81 districts comprise, with some agricultural districts, the principal towns and cities of England. The population was 6,578,912 in 1841."

The public health, during the past quarter ending September 30th, was good; for the deaths, notwithstanding the increase of the population, were only 36,008, or 1870 less than the average of the corresponding quarters of five former years (1840—44). This favourable state of things was general, and was observed in the majority of the town districts of the kingdom. The southern coast has been unusually healthy through the summer; the deaths in Brighton, on an average 262, were only 219; in the Isle of Wight, the deaths, on an average 183, were 121; in the Portsea Island (Portsmouth), the deaths, on an average 299, were 239; in Exeter, the deaths, on an average 200, were 160; in Plymouth, the deaths, on an average 224, were 191; in Penzance, the deaths, on an average 292, were only 166; in the quarter ending September 30th, 1845.

The mortality has been below the average in every district round the south-eastern and southern coast, from London to the Land's End; yet the average mortality itself is low throughout that part of the country. In the last Report, (p. l.) it will be seen that only 1·9 per cent., or 1 in 52, of the inhabitants die annually in the south-eastern and south-western divisions, while the annual mortality of the whole kingdom is 1 in 45.

In Austria, including the northern parts of Italy, the annual mortality is 1 in 33\*; and the mortality throughout Italy is not less than in Austria. In the cities of Italy, the mortality, according to official documents, varies from 3 to 4 per cent. In France the annual mortality is 1 in 42.

The mortality was *above* the average of the corresponding quarter, in the following districts:—Northampton, Bedford, Yarmouth, Kidderminster, Leicester, Rochdale, Halifax, Bradford, Pontypool, Newtown, Holywell, and Anglesey.

Leicester is an unhealthy district; the average mortality is high; the average number of deaths in the summer quarter is 325, and in the last quarter no less than 457 deaths were registered. The Registrar of the East District remarks—"Since that time (1840) vaccination seems to have been totally neglected; hence the great increase of deaths for this and the preceding quarter. I have registered 73 DEATHS FROM NATURAL SMALL-POX, and only 4 persons that had been vaccinated, and those only very doubtful. *Measles* has been very fatal; I have registered 57 deaths from that epidemic."

The fatality of *Small-pox* is mentioned by the Registrars of Yarmouth, Northampton, Wolverhampton, Birmingham, Coventry, Basford, Liverpool, Bury, Prescott, and other districts, in their remarks.

METROPOLIS.—76 deaths from *Small-pox* were registered in the quarter: the average is 130. In the week ending September 13th, no death from *Small-pox* was registered. Such an exemption has never before been observed since the new Tables were published. *Measles* has been epidemic; 688 deaths have occurred from that disease. *Whooping-cough* has been prevalent. Of *Scarlatina* only 194 persons, chiefly children, died; the average is 476. Only 2 deaths from privation were returned; the average of the quarter is 5.

## MORTALITY OF THE COUNTRY.

*Quarterly Table of the Mortality in 115 of the Districts of England (including the principal Towns), shewing the Number of Deaths Registered in the Four Quarters of 1844, and in the Quarter ending September 30th, 1845. Also the Average Number of Deaths in the Five Quarters, ending September 30th, 1840-1844.*
